DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

2. The information disclosure statement filed 1-12-01, 4-12-01, and 5-8-01 has been considered.

Title

3. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 50-51 are rejected under 35 U.S.C. 102(b) as being anticipated by Kisu. Kisu teaches a charging roller facing a surface of a body to be charged and applied with a voltage, said charging roller comprising a metallic core including axially opposite end portions larger in diameter than the other portion; an elastic member covering said core; elastic member provided on said core, including said opposite end portions, such that said elastic member has a same outside diameter throughout an entire length in an axial direction; and films respectively wrapped around portions of said elastic member

corresponding to said opposite end portions of said core. The charging roller comprises a charge roller for uniformly charging said body to be charged.

6. Claim 52 is rejected under 35 U.S.C. 102(b) as being anticipated by Miyake et al. (JP 4-360168A). In a charging roller cited by applicant comprising a metallic core and an elastic member covering said core, a stripe-like or a wire-like spacer member is spirally wrapped around said elastic member (Figure 2 or 4).

Allowable Subject Matter

7. Claims 1-50 are allowed. These claims recite that when the elastic member deforms, it deforms such that the maximum amount is smaller than a thickness of the films.

Prior Art of Record

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ehara teaches a spiral magnetic pole on a charging roller.
